Spring Flowers are Planted in the Fall

ARCHIAS' SEED STORE from the beginning have made a point of supplying the best bulbs, seeds and plants that it is possible to produce, and this policy has given Archias a standing with the trade of which we are justly proud. In offering the following list of stock for fall planting we do so with the assurance that everything in it is of tried and proven merit and we have the fullest confidence that our customers will be satisfied.

Remember that in order to have these spring flowers it is necessary to plant the bulbs this fall, and we advise that you place your order for them at once. Below we give a great deal of valuable information about the planting and handling of bulbs, and if these instructions are closely followed success is certain.

Indoor Culture

Bulbs intended for blooming during the winter can be planted in pots, pans or boxes, and left in the open air, covered with a few inches of ashes or soil, until the earth begins to freeze, and then placed in a cool greenhouse, cold frame, or room, at a temperature of 50 degrees. They will need, occasionally, moderate watering after they are brought indoors. Or the pots, pans or boxes may be placed at once, after potting, in a cool, dark cellar, watering well and covering the same as above. The whole success of pot culture depends upon getting the roots well established in the pots, at a low temperature of 40 or 50 degrees, before you begin to force the tops at 60 degrees or over. After this the bloom is easily developed by giving light and water; and some of the best flowers from Christmas until after Easter by regulating the time of bringing them to the light.

We give full cultural instructions on planting and care of bulbs mailed free to customers who ask for it when ordering.

Outdoor Culture

Applying well-rotted cow or sheep manure or bone meal; fresh manure is injurious to bulbs. The soil should be well drained. A small quantity of crushed limestone or coal ashes at the base of each bulb when planted in stiff soil will be beneficial. In planting, the bulbs should be placed from an inch to four inches below that of the bulbs. Cover the bulbs with soil one and one-half times their own depth. When the ground freezes the bed should be covered with two to three inches of stable bedding or litter, to be removed in early spring. Too early and heavy covering starts the tops prematurely.

HOW TO SEND MONEY. Money can be sent safely either by Post Office Order, Bank Draft, Express Order or Registered Letter. We receive postage stamps the same as cash.

WE GUARANTEE all goods ordered of us to reach the purchaser safely and in good condition. If lost or damanged we will refund the order. While we exercise great care in selecting all seeds, bulbs, plants and trees, and having them reliable and true-to-name, we give no warranty, expressed or implied, as to purity or germination, and will not hold ourselves responsible for any failure thereof. If not accepted on these conditions they must be returned at once.

Six Grand Single Early Tulips

This class gives us the first bright flowers in spring, usually blooming about the middle of April to the first of May. The uniformity of their height and their upright short stems make them very desirable for planting in beds, parkways and similar locations. They are particularly good for forcing and pot culture, blooming very early and of dwarf habit.

**ARTUS.** Bright scarlet, good former and bedder. Height 14 inches. 65¢ per doz.; $4.50 per 100.

**COTTAGE MAID.** C. 8 in. Delicate rose, center of petals feathered white. Height 12 inches. 70¢ per doz.; $5.00 per 100.

**BUCHESSE DE PARMA.** C. 15 in. Very large fine flower of orange-scarlet, yellow edge. Height 15 inches. 75¢ per doz.; $6.00 per 100.

**FLAMINGO.** Flaming dark rose, edged light rose. Very attractive. Fine former. Height 12 inches. Doz., 90¢; 100, $7.00, postpaid.

**KEIZERSKROON.** Scarlet, edged with golden yellow; very large flowers. Height 16 inches. 85¢ per doz.; $6.50 per 100.

**YELLOW PRINCE.** Golden yellow; one of the best yellows for forcing. Height 13 inches. 85¢ per doz.; $6.50 per 100.

Archias’ Special Mixture of Early Flowering Single Early Tulips

**ARCHIAS’ SPECIAL MIXTURE.** Made up from named sorts, proper proportions of bright colors, all blooming together and of uniform height; extra fine bulbs. 60¢ per doz.; $4.00 per 100, postpaid.

Rembrandt Tulips

An attractive class of late-flowering Tulips similar to the Darwins in season and habit, but distinct from that type in color and marking. A variety that will become very popular when better known. The blooms are either striped, feathered or blotched. Same culture as the Darwins.

**MIXED REMBRANDT TULIPS.** A splendid mixture of all colors. 75¢ per doz.; $5.00 per 100.

Majestic Breeder Tulips

The Darwin’s greatest rival. As tall and stately as that superb variety, and the most popular of all late Tulips today.

Their wonderful color combinations in harmonious blendings of purple and bronze, yellow and bronze, grey and lilac, old-gold and maroon, and but tones, justly reward the admiration of every flower lover. While they are late to bloom, they surpass the Darwins in size and brilliancy of color. The flowers are excellent for cutting, many of them are elegantly sweet scented.

**BRONZE QUEEN.** Large, strong flower, purplish fawn, interior buff yellow, bright lemon-chrome base. Height 24 inches. 65¢ per doz.; $4.50 per 100.

**CARDINAL MANNING.** Dark rosy violet, changing to an almost pure orange at the extreme edges of the petals. Height 28 inches. 85¢ per doz.; $6.00 per 100.

**LORD BYRON.** Very large perfect flower of rich purplish red. Height 26 inches. 80¢ per doz.; $6.00 per 100.

**MARIE LOUISE.** Old rose, flushed orange-salmon, edged brzony orange; olive base. Height 23 inches. 80¢ per doz.; $5.75 per 100.

**YELLOW PERFECTION.** Light bronze yellow, edged golden. Height 21 inches. 85¢ per doz.; $6.00 per 100.

**MIXED BREEDER TULIPS.** Made up from above named varieties. 75¢ per doz.; $5.00 per 100.

Mammoth Named Crocus

These are larger and stronger bulbs than the mixtures and produce correspondingly finer flowers.

**PRINCE ALBERT.** Dark blue. 40¢ per doz.; $3.00 per 100, postpaid.

**CLOTH OF GOLD.** Gold striped. 50¢ per doz.; $4.00 per 100, postpaid.

**SIR WALTER SCOTT.** White striped. 40¢ per doz.; $3.00 per 100, postpaid.

**MONT BLANC.** Large white. 40¢ per doz.; $3.00 per 100, postpaid.
Archias' Superfine Bedding Hyacinths

These are selected named sorts, grown in Holland, best adapted for beds and borders in the garden or for florists' greenhouse forcing for cut flowers and are of such superior quality as to be used in immense quantities for both purposes. Especially desirable where a grand display is desired at a low cost. If you wish bulbs for house culture and pots, we would strongly advise you to use the named sorts as the individual spikes will be larger and more perfect.

Dutch Miniature Hyacinths

for Forcing

This superb form of Hyacinth has been neglected for a long time, because their beauty and ease of culture as pot plants is not generally known. They are, as the name implies, miniatures of the large exhibition sorts with spikes 3 to 5 inches long and nicely formed. A 7- or 8-inch pot with 9 or 10 of these bulbs in full bloom is indeed a thing of beauty. Plant same as the exhibition sorts, set away in a cool dark place for about 1-1/2 weeks and bring into bloom in a cool room. The following sorts have proven best in our trials.

Latham Raspberry
(Minnesota No. 4)

Yields Twice as Much as Other Red Raspberries.
Here is a new red Raspberry that was originated in Minnesota and acclaimed for its hardiness in that state. During the past few winters, its merits have been brought to the attention of the planting throughout the middle and eastern states. The high yielding ability of the Latham is due largely to its resistance to Mosaic and other red Raspberry diseases; wherever tried, reports have been most favorable. It possesses the hardness of "King" and produces very strong, vigorous, thornless canes; very productive. Berries are large, of highest quality, ripen evenly and hold up well throughout the season. The canes do not need covering even in severe locations. We have a fine stock of this splendid new variety and hope you will give it a thorough trial, as we are sure it will prove a money-maker for you, especially in a season when other standard varieties freeze out. 12 for $1.00; 25 for $1.65; 100 for $4.50, postpaid.

Directions for Planting Strawberries

For small gardens, plant 12 x 30 inches apart. For field culture, plant 1½ x 3 feet, requiring 8,000 plants per acre. Well drained, rich soil. Fertilize with Vigoro or Vegetable Special Fertilizer. Do not use stable manure as it will attract grubs and cut worms. Mulch in fall.
Seeds of Hardy Perennials may be sown any time during the summer or early fall in the garden or cold frame to produce plants that will flower the next season, and continue to bloom each succeeding year. Transplant before frost where intended to remain. During the winter it will prove beneficial to the plants if a covering of loose litter or straw is provided. A hardy bed or border, when once established, requires practically no attention and will, if varieties have been properly selected, provide an abundance of flowers from early spring until frost.

Archias’ Evergreen Lawn Grass Seed

This is a mixture of celebrated Kentucky Blue Grass and other soft-bladed grasses that will 'withstand the heat and dry weather of our Summer and our most severe Winters, and insure a permanent evergreen lawn. Archias’ Evergreen Lawn Grass Seed is as pure and reliable as can be found anywhere. We highly recommend this mixture for general purposes. Lb., 35c; 3 lbs., $1.00; 10 lbs., $3.00, prepaid. For other seeds suitable for lawns, see page 15.

Archias’ “Shady Nook” Lawn Mixture

A mixture of grasses that will thrive in a shady situation, under trees or close to walls where there is little sun. Lb., 45c; 3 lbs., $1.20; 10 lbs., $3.50.

To Produce a Good Lawn

Plow or dig up the surface thoroughly to a depth of 12 inches and mix the soil with well rotted manure or our Archias' Sure Lawn Fertilizer, the latter being at all times preferable, as it is more durable in its effect and free from weed seeds, which are always contained in more or less quantities in stable manure. The soil should be well pulverized before sowing, and the lawn kept free from weeds the first season. The quantity of seed required is one pound to every 300 square feet.
